

Electric Vehicle Charging Station - Nagambie

Background

Council partnered with Evie Networks to install an Electric Vehicle Charging Station in Nagambie.

The stations are powered by 100 per cent renewable energy meaning they will be sustainable into the future as the cost of living and petrol prices increase.

Three location options were determined for the charging station and we called on the Nagambie community to share their thoughts on their preferred location.

The Engagement Approach

We used both our online engagement platform Share Strathbogie as a method for community members to vote. Information on this was shared via the Nagambie Community Voice and our social media platforms.

We also held a drop-in engagement session in Nagambie where community members could interact face-to-face and place their votes at the session.

Depth of Engagement (Stage 1)

Depth: Inform

Public participation goal: To provide open and honest communication materials that ensure our community understand the three options and why these locations were selected.

Promise to the public: We will be honest and open with community members and adequately inform them.

Depth of Engagement (Stage 2)

Depth: Involve

Public participation goal: To work directly with the public throughout the process to ensure that public feedback is consistently understood and considered.

Promise to the public: We will work with you to ensure that your concerns and aspirations are directly reflected in the alternatives developed and provide feedback on how public input influenced the decision.

Participation and reach
